BOXES, CARTONS
& TOTES

Boxes, Cartons & Totes

Amatech offers standard nestable tray and corrugated plastic boxes and totes. Our corrugated plastic boxes and totes are custom designed to meet specific needs in standard or nonstandard sizes. Nestable trays feature tapered sides and can be wire reinforced for extra rigidity.

Our stackable totes can be produced with a variety of stacking materials such as PVC stacking rings or aluminum U-channel and stacking corners.

Our common reusable packaging containers sometimes known as RSC, HSC, DSC, RETF, etc. are designed and built to replace paper corrugated (cardboard) containers with the same design. We use hook and loop closures (velcro) on the flaps to eliminate tape, and have interlocking designs for more weight capacity. We can integrate plastic and/or foam dunnage to fit any style tote.

This guide will walk you through some examples of boxes, cartons & totes.

BOXES, CARTONS & TOTES

Standard RSC Box

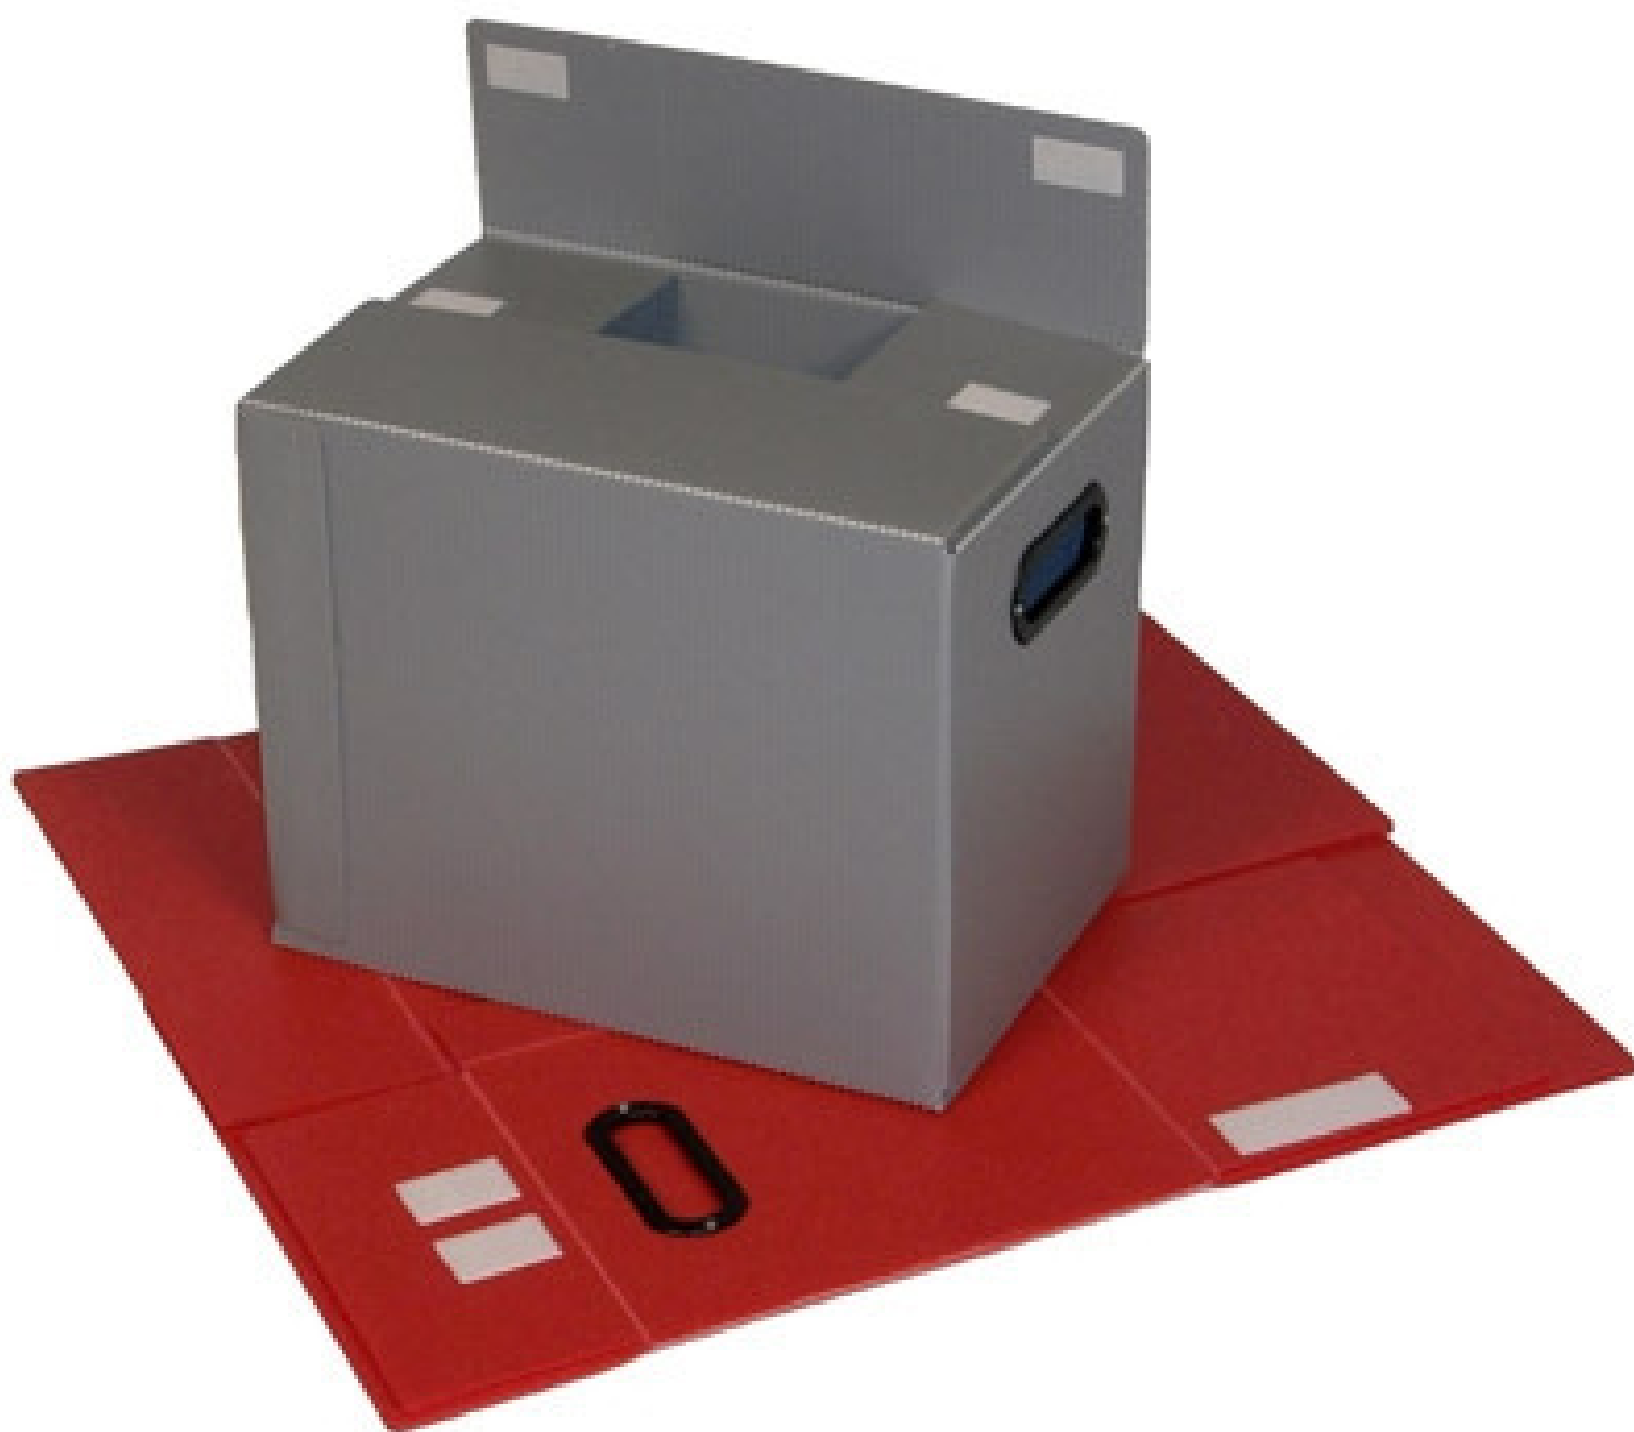

A Standard RSC (Regular Slotted Container) Box
This standard box has top and bottom closing flaps and is commonly referred to as a RSC (Regular Slotted Container). We can incorporate hook and loop closures on the flaps and all sides, flaps are heat welded for maximum strength. Interlocking top & bottom can also be integrated to allow the box to collapse flat.

Types of RSCs:

Flaps (top & bottom)

Autobottom

FOL Interlocking Bottom

File Box with Lid

File Box with Lid

This PP Corr file box with lid is a great solution for storage of files and can resist moisture and mold damage, much like you see in storage with corrugated (cardboard) cartons.

Stackable Tote

Stackable Tote

This plastic corrugated version of a stackable tote is a great solution when a non-standard size tote is needed. We can design and produce it in any size you need. We can also integrate handles, printing, and our dunnage (dividers and/or foam) in all of our totes.

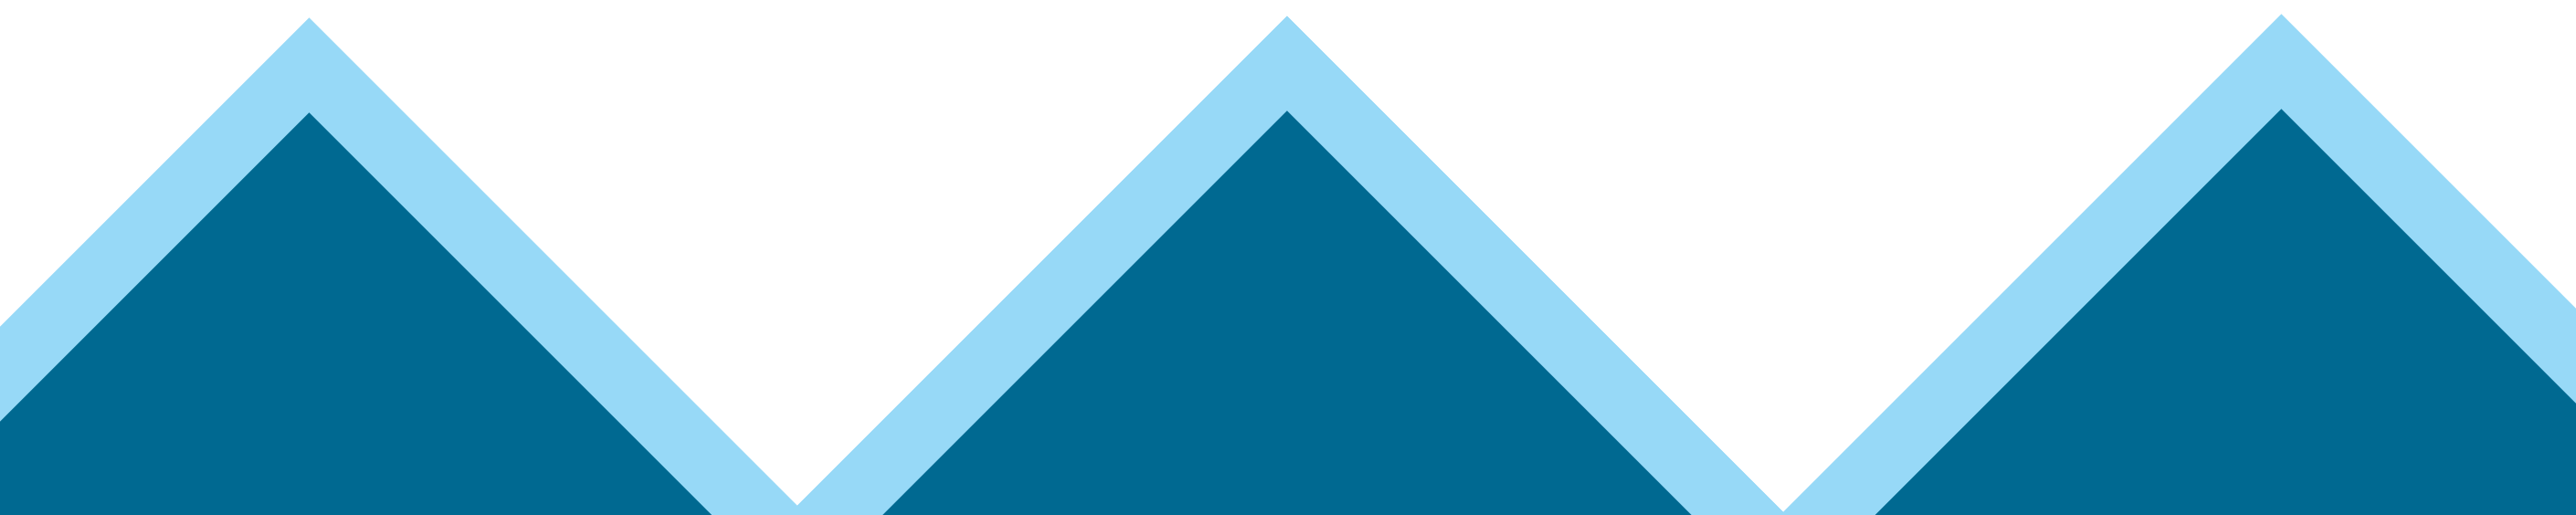

Nestable Letter Tray

Nestable Letter Tray

This nestable letter tray is available in many colors and used in many environments. All of our trays are heat welded for maximum strength.

RETF Carton with Dividers

RETF Carton with Dividers

We produce many cartons in many different variations to meet our customer's needs. This shows how we can design and produce a divider to fit an RETF (Rolled End Tuck Front) Carton.

Folded Up Carton

Folded Up Carton

This shows another variation of a fold up carton fully assembled. It actually sitting on top of blank of a carton before being assembled. Many styles and colors are available.
